

The Way to Find the Right Privacy Filter

Carefully measure the viewable height and width of your screen.
Please not include the screen frame in your measurements.

Once you have your measurements, match them with the appropriate model in the table on page 2 and page 3.

Note:

For frameless filters, choose the size that matches your exact measurements or slightly smaller.
For framed filters, choose the size that is nearest your measurements or slightly larger.

If you have questions about measuring your screen or selecting the correct filter size, please call us on 03 9888 6677
