

MOBEL POSTURE

ELECTRIC HEIGHT ADJUSTABLE DESK

ONE FRAME, ONE PACKAGE: THE PERFECT SIT/STAND SOLUTION!

Mobel Posture is a unique sit/stand desk: one frame, packed in one handy, heavy-duty carton. The pre-assembled frame is foldable and telescopic; therefore installation is easy and very fast. The height adjustment of 65-130 cm meets all necessary standards. Moreover, the low noise adjustment makes it suitable for the quietest areas. Mobel Posture is the perfect sit/stand desk: for in the office, at home, in study rooms or in workshops.

Smart packaging: everything in 1 box!

Simple installation: one frame, many different desk dimensions

Fast: 40 mm per second.

Quiet: only 39 dB!

Height adjustment: 65-130 cm

The Mobel Posture desk frame is packed in a heavy-duty carton box of 122x22x28 cm (lwxhxh) with an overall weight of approximately 40 kg. The packaging is equipped with six handles for easy handling.

Frame available in white RAL9016.
Worktop available in Laminate Classic Beech, Laminate White or Bamboo.

MOBEL POSTURE | ELECTRIC HEIGHT ADJUSTABLE DESK

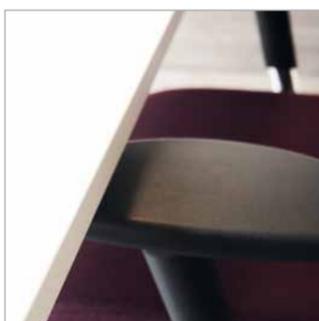

Mobel Posture is operated by a user-friendly and eco-friendly handset. Its standby power is less than 0,1W. As an option, a more advanced handset with four memory settings can be chosen.

The columns of Mobel Posture are square: 70x70, 60x60 and 50x50 mm. The length of the foot is 75 cm. The maximum load capacity is 120 kg and it has a height adjustment speed of 40 mm per second.

The Mobel Posture frame is telescopic from 116 cm to 196 cm. The frame is suitable for worktops of 120-200 cm although, with a small overhang even worktops of 240 cm can be used.

The anti-collision function ensures that the height adjustment of Mobel Posture will be automatically terminated and its direction reversed when someone or something obstructs the movement of the table. This works both ways: nothing can be damaged while Mobel Posture moves up or down.
